GENERAL CONSTRUCTION NOTES

1. The purpose of these General Notes is to provide guidance on the installation of structural steel/concrete building systems. These notes should be reviewed and incorporated into the project drawings and specifications.

2. These General Notes shall not be used as a basis for determining the quality of materials or workmanship to be used in the construction of the project. They are intended to provide guidance and information to the project team.

3. All General Notes apply to the entire project and shall be considered part of the contract documents.

4. The General Notes provide a general overview of the structural steel/concrete building systems to be installed on the project. They are intended to be read and understood by all parties involved in the project.

5. The General Notes are subject to change and modification throughout the course of the project.

6. The General Notes are intended to be read and understood by all parties involved in the project.

STRUCTURAL STEEL NOTES

1. All structural steel shall be fabricated and erected in accordance with applicable codes and standards.

2. All structural steel shall be designed and fabricated in accordance with the latest edition of the American Institute of Steel Construction (AISC) specifications.

3. All structural steel shall be erected in accordance with the latest edition of the American Society of Civil Engineers (ASCE) guidelines.

4. All structural steel shall be tested in accordance with the latest edition of the American Society for Testing and Materials (ASTM) standards.

COATINGS

1. All structural steel shall be painted in accordance with the latest edition of the American Association of State Highway and Transportation Officials (AASHTO) specifications.

2. All structural steel shall be coated with a primer and a topcoat in accordance with the latest edition of the American Society of Testing and Materials (ASTM) standards.

3. All structural steel shall be coated with a protective finish in accordance with the latest edition of the American Society of Testing and Materials (ASTM) standards.

4. All structural steel shall be coated with a durable finish in accordance with the latest edition of the American Society of Testing and Materials (ASTM) standards.
GENERAL NOTES:
1. ALL COMPONENTS TO BE HOOKED ORGANIZED AFTER INSTALLATION.
