

**Krutika Kuppalli, MD, FIDSA**

Medical Officer for COVID-19 Health Operations, World Health Organization

Krutika Kuppalli, MD, FIDSA is a Medical Officer for COVID-19 Health Operations in the Department of Epidemic and Pandemic Preparedness and Prevention in the Health Emergencies Program at the World Health Organization. She completed her Internal Medicine residency and Infectious Diseases fellowship at Emory University, a Post-Doctoral Fellowship in Global Public Health at the University of California, San Diego and was an Emerging Leader in Biosecurity Fellow at the Johns Hopkins Center for Health Security. Dr. Kuppalli currently serves on the American Society of Tropical Medicine and Hygiene (ASTMH) Trainee Committee and is the Chair of the Infectious Diseases Society of America (IDSA) Global Health Committee.

Dr. Kuppalli was previously a Fogarty International Clinical Research Fellow and conducted research in Southern India to understand barriers to care and how emerging infections impacted individuals living with HIV/AIDS. She was the medical director of a large Ebola Treatment Unit in Sierra Leone during the 2014 West Africa Ebola outbreak, helped lead the development and implementation of pandemic response preparedness activities in resource limited settings, and has consulted on the development of therapeutics for emerging pathogens. Her clinical and research interests focus on health systems strengthening in resource limited settings, research and clinical care for emerging infections, outbreak preparedness and response, and policy. She has worked in Ethiopia, India, Sierra Leone, Uganda, and Haiti.
